(54) Title: FILTER FOR INTERNAL COMBUSTION ENGINES

(57) Abstract: Filter for internal combustion engine liq-  
uids, comprising a casing (2) closed by a removable cover  
(4) and containing a toroidal filter cartridge (3) which se-  
parates the casing cavity into two chambers (21, 22) for pas-  
sage of the liquid to be filtered and passage of the filtered  
liquid respectively, in which the inner region of the cover  
is connected to the facing end of the cartridge by a snap  
connection system comprising two complementary parts  
(10, 111) which are associated with the cover and with the  
cartridge respectively, and can be connected together by  
axially sliding said cartridge and released from each other  
by rotating this latter through a predetermined angle, that  
part of the system associated with the cartridge being lo-  
cated within the central compartment of this latter, and is  
that part of the system associated with the cover being di-  
mensioned and shaped to be able to be inserted into the  
preceding and coupled thereto, where it retains the facing  
end of the cartridge in the immediate vicinity of the inner  
region of the cover.
